SWATCHPRO™

USER GUIDE

HOW TO USE YOUR SWATCHPRO™

1. Open the TGB SwatchPro™ book and remove the nail swatch line by gently pulling the oval surface on the right-hand side.
2. Take out the strip of nail tips, wipe with a clean TGB Lint Free Wipe and paint with your TGB Gel Polish colours, BIAB™, GelPot or ProForm™. Cure all the nail tips in one go whilst they're attached to the strip to save time.
3. Once all the tips are cured, remove each individual tip and add a small dot of TGB Nail Glue to the narrowest end of the nail tip.
4. Fit your nail tip into the empty swatch space and press gently until the glue has adhered and dried completely.
5. Add the correlating colour name sticker onto the back of the nail swatch line so you can easily refer to what colour your customer has chosen.
6. When you have finished simply click your nail swatch line back into place. Repeat the steps until your colour bible is full. Don't forget, your customers can easily unclip the nail swatch line to try on colours before they choose!

HOW WILL YOU ORGANISE YOUR SWATCHPRO™?

- Perhaps you'll arrange your SwatchPro™ by colour range, colour name... or maybe something else? Remember, you can update your SwatchPro™ whenever you like! It's as simple as pulling out your chosen nail tip and following the above steps to replace it with your new colour. Use #SwatchPro #TGBSwatchPro to show us how you arrange yours.

HOW TO CLEAN YOUR TGB SWATCHPRO™

- To keep your SwatchPro™ in sleek condition, we recommend cleaning with an antibacterial spray. Do not use acetone-based cleaners as this will damage the product.
