TGB ACETONE & SOAK AWAY

HOW TO GUIDE

SOAK AWAY

HOW TO GUIDE

DIRECTIONS FOR USE:

1. Debulk the nail enhancement.
2. Apply Soak Away to TGB Fresh Start Removal Foils and wrap tightly around the nail.
3. Leave to soak for 5 minutes.
4. Use your TGB ProPrep to gently remove any remaining gel from the nail plate. If any stubborn product remains, rewrap the nail and allow to soak for a further 5 minutes.

TGB ACETONE

HOW TO GUIDE

DIRECTIONS FOR USE: FOR DEHYDRATING AND CLEANSING THE NAIL PLATE

1. Dampen a Lint Free Wipe with TGB Acetone and wipe each nail thoroughly. This will dehydrate the nail plate, removing any oils or residues and prepping it for product application.

FOR REMOVING GEL POLISH:

1. File the surface: Gently file the top layer of the gel polish to break the seal.
2. Soak the nails: Apply TGB Acetone and wrap each nail with TGB Removal Foils. Let it soak for 10-15 minutes.
3. Remove gel polish: Push off the softened polish with your TGB ProPrep Cuticle Pusher. If needed, soak for a few more minutes and repeat.
